

Cloud Engineer - Azure, Databricks, Windows, Linux

[Apply Now](#)

Company: Intelliswift Software

Location: Canada

Category: other-general

Must Have skills: Azure, Databricks, Windows, Linux, Configuration management, IAAC

Looking for an experienced Cloud Engineer (Azure preferred) with experience with both Linux and Windows. A solid requirement for this role is to have a strong knowledge of data lakes (deployment, management, and optimization) especially Databricks. A firm understanding of Infrastructure as Code and configuration management tools will be important for this role.

Some nice to have skills include automation experience, knowledge of GCP, and coordinating cross-functional tasks.
